Summary

We invite you to join Iman Firoozi for a presentation and live Q&A session on the topic of arc flash, where he'll review risks and best practices towards the goal of improving electrical safety.

Join this session to:

- LEARN more about arc flash characteristics, causes, and hazards associated with incident energy;
- DISCOVER various methodologies for assessing risk, and strategies to mitigate arc flash hazards, including specific application examples;
- EXPLORE detection and mitigation approaches using protection relays, with an understanding of the pros and cons for each approach.

Speakers

Iman Firoozi

Senior Global Product Manager
GE - Grid Solutions

Iman holds a Master's Degree in Electrical Engineering, and has 15+ years experience in switchgear and power equipment.
